Summary

Im a B.Tech student at SASTRA University with a strong interest in Software Engineering, AI Engineering, and Data Engineering. I enjoy solving problems, understanding how systems work under the hood, and turning ideas into practical solutions.My technical interests span Python, SQL, full-stack development, cloud technologies, data pipelines, and LLM-powered applications. I've worked on projects involving retail analytics, sales forecasting, and AI-driven workflows, which have helped me explore how technology can solve real-world problems.Im particularly interested in building intelligent systems using AI agents, exploring scalable data architectures, and developing reliable applications. I enjoy learning new technologies, experimenting with different approaches, and continuously strengthening my problem-solving and engineering skills.Im always open to connecting with people who share an interest in software development, AI, data engineering, and building impactful products.
